Software developer building scalable web applications, RESTful APIs, and automation tools with expertise in Python, Spring Boot, and the MERN stack.

Professional experience

see more on linkedin

Mar 2025-present

CodeNod - Software Developer

India

Building full-stack and AI-driven features using Python, Node.js, and modern JavaScript frameworks.

Responsibilities

- Develop scalable backend services and REST APIs with Python and Node.js.
- Integrate MySQL-backed services and maintain production-ready data workflows.
- Build responsive interfaces with React, Tailwind CSS, and Remix.
- Use Docker-based workflows to streamline development and deployment.

Dec 2023-present

Freelance - MERN Full-Stack Web Developer

India

Deliver full-stack web applications with the MERN stack for client projects.

Responsibilities

- Build and deploy end-to-end features across MongoDB, Express.js, React, and Node.js.
- Design responsive frontends with reusable components and Redux-based state management.
- Create and maintain REST APIs for product and user flows.
- Optimize app performance and scalability for production workloads.

Mar 2025-present

Coaching Center - Computer Science Teacher

India

Teach computer science and digital literacy to students new to computers.

Responsibilities

- Explain foundational computer concepts in simple, practical lessons.
- Design class exercises that improve confidence with digital tools.
- Support students in understanding core CS problem-solving approaches.

Jun 2024-present

Independent Teaching - Computer Fundamentals Instructor

India

Provide instruction in computer fundamentals and advanced concepts.

Responsibilities

- Prepare structured sessions from basics to advanced computer topics.
- Mentor learners with different starting skill levels.
- Track learner progress and adapt teaching material for clarity.

Feb 2024-Dec 2024

Potato Cold Store - Logistics Clerk

India

Managed records and logistics data entry operations for inventory handling.

Responsibilities

- Maintain accurate logistics registers and daily inventory records.
- Coordinate data updates for stock movement and storage operations.
- Ensure record consistency to support reliable logistics reporting.

Projects

E-Commerce Full-Stack Website
Built with React.js, Redux, and Node.js. Users can add products to cart, view cart contents, and update quantities.
https://micro-it-internship.onrender.com

Web Scraping and Automation
Built a flexible scraping and data extraction system with Node.js, Express, and Python requests, designed for easy site adaptation.
rohitsaini81/

Online Compiler Service
Built a browser-based code compiler service using Node.js to compile and run programs directly in the web interface.
https://online-java-compiler.onrender.com

Real-Time Live Chat
Built a real-time chat app with Socket.IO and Node.js including direct peer-to-peer file sharing for lower server load.
https://whatsapp-chat-lo5f.onrender.com

Video Streaming Platform
Built with Next.js SSR and Spring Boot with PostgreSQL, plus analytics and SEO improvements for better discoverability.
rohitsaini81/

SwipeMatch Dating App
Built with MERN and Tailwind CSS featuring secure auth, swipe flows, real-time chat, and Redux state management.
http://www.swipematch.online/

Skills

General
System design and architecture - REST API development - Web scraping and automation - Cloud and container workflows - Linux and security fundamentals

Languages
Java - Node.js - JavaScript - Python

Frontend
React.js - React Native - Redux - Next.js - Tailwind CSS - Remix

Backend
Express.js - Spring Boot - Socket.IO

Databases
SQL - PostgreSQL - MongoDB - MySQL

Tools
AWS - Docker - Git - Cursor AI - Codex - Claude Code

Education

2023 — Kurukshetra, India
Shaheed Udham Singh College, Kurukshetra University
BCA
Score: 70%

2020 — Karnal, India
Govt. Senior Sec. School
Class XII
Score: 63%

2018 — Karnal, India
Govt. Senior Sec. School
Class X
Score: 50%
